GENERAL BULLETIN, 564
FERTILIZER REPORT
1938

JOHN H. LIGHT, *Secretary of Agriculture*

ELMER E. HARTER, JR., *Director of Foods and Chemistry*
Bureau of Foods and Chemistry

Published bi-monthly by direction of the Secretary. Entered as second class matter.
March 22, 1918, at the Post Office at Harrisburg, Pa., under the Act of June 6, 1900.

FERTILIZER REPORT--1938

INTRODUCTION

All products intended for fertilizing purposes are required to be registered annually in accordance with the provisions of the Pennsylvania Fertilizer Law, Act of May 1, 1909, as amended. The dung of domestic animals, marl, lime, and wood ashes are exempt.

Section 1 requires the following information to be shown on sacks or attached cards: (a) The number of pounds of fertilizer contained in the package; (b) the name, brand, or trade mark under which the fertilizer is sold; (c) the name and principal address of the manufacturer, importer, or other person putting the fertilizer on the market in this Commonwealth; (d) guarantee for nitrogen; (e) guarantee for total phosphoric acid, except in mixed and superphosphate fertilizers; (f) guarantee for available phosphoric acid; (g) guarantee for potash soluble in distilled water.

All mixed fertilizers are required to contain at least sixteen units of plant food based upon guarantees for nitrogen, available phosphoric acid, and water soluble potash, and which guarantees must be stated in even units. .

Applications for registration are forwarded to each licensed manufacturer at the end of the calendar year, and it is necessary to report on same the preceding year's tonnage sales of each brand in order that license or registration fee can be properly computed. Tonnage sales are likewise required for brands even though they are not to be re-registered.

The Agents of the Bureau of Foods and Chemistry are authorized to obtain official samples which, together with reports giving full information for each individual sample, are forwarded direct to the Laboratory where a check of records is made to determine whether the brands are registered. Where it is found that these official samples are duly registered, an analysis is conducted to ascertain whether or not the fertilizer meets its guaranteed analysis.

During the year 1938, the Agents of the Department collected 1,200 official samples, and of this number, 1,179, representing 487 brands, registered by 44 manufacturers, were subjected to analysis and classified as follows:

	BRANDS	SAMPLES
Complete Fertilizers.....	360	894
Ground Bone Fertilizers.....	12	15
Superphosphate Fertilizers.....	62	180
Lime Phosphate Fertilizers.....	12	18
Rock and Potash Fertilizers.....	33	64
Miscellaneous Fertilizers.....	<u>8</u>	<u>8</u>
Total	487	1179

BRANDS REGISTERED AND TONNAGE SALES

The registration fee for each new brand of fertilizer is \$15, and where old brands are to be re-registered, the scale of fees is as follows: 0 to 150 tons, \$15; over 150 tons to 250 tons, \$20; over 250 tons to 400 tons, \$30; over 400 tons to 500 tons, \$40; over 500 tons, \$50.

Licenses were issued to 116 manufacturers to cover sales of their brands for the year 1938. These licenses included 1,033 brands of which 798 were mixed fertilizers and 235 so-called "base" materials such as nitrate of soda, sulphate of ammonia, bone, etc.

The 1938 applications for registration showed that 370,162 tons of all classes of fertilizers were sold during the year 1937 (compared with 318,330 tons sold during 1936) and classified as follows: Complete Fertilizers, 255,457 tons; Ground Bone Fertilizers, 2,281 tons; Superphosphate Fertilizers, 87,891 tons; Lime Phosphate Fertilizers, 6,831 tons; Ammoniated Phosphate Fertilizers, 152 tons; Rock and Potash Fertilizers, 10,499 tons; and Miscellaneous Fertilizers, including the following: Tankage, 2,791 tons; Dried Blood, 16 tons; Nitrate of Soda, 96 tons; Potash Salts, 671 tons; Sulphate of Ammonia, 470 tons; and unclassified 3,007 tons.

The 1937 tonnage figure reveals that there were supplied 8,125 tons of nitrogen, 44,582 tons of available phosphoric acid, and 16,681 tons of water soluble potash, or a total of 69,388 tons of plant food. The amount of plant food is in excess of that supplied during the year 1936, namely 58,013 tons.

CONCLUSIONS

Of the 1,179 official samples analyzed, 168 or 14.2% were found to be deficient in one or more elements of plant food, compared with guarantees to the extent of .2% or more. The proportion of deficiencies is higher than that reported for the year 1937.

Considering the plant food elements separately, 68 samples or 7.43% were found to be deficient in nitrogen, 28 or 2.38% deficient in phosphoric acid, and 81 or 8.43% deficient in water soluble potash.

Of the total number of fertilizers analyzed, 894 were complete fertilizers and 154 or 17.22% were found to be deficient, 66 or 7.38% deficient in nitrogen, 25 or 2.79% in available phosphoric acid, and 81 or 9.06% in water soluble potash.

Several official samples were obtained where the word "tobacco" formed a part of the brand name, and, upon examination, the potash content was found to be in a form other than chloride as required by law.

Two deficiencies were found in the Ground Bone Fertilizers, 2 Superphosphate Fertilizers were deficient in available phosphoric acid, and 10 samples in the Rock and Potash group were found below guarantees, 1 being deficient in available phosphoric acid and 9 deficient in water soluble potash. No deficiencies were found in the group classified as Miscellaneous Fertilizers which included 2 samples of Nitrate of Soda, 2 samples of Muriate of Potash, 3 samples of Sulphate of Ammonia, and 1 sample of Milorganite.

The average unit values, estimated from the average retail selling prices, were as follows: Nitrogen \$2.93, Available Phosphoric Acid \$1.08, Water Soluble Potash \$1.47.

The average retail selling price for Complete Fertilizers was \$30.62 a ton, compared with \$29.26 for 1937.

It is noted that 14.2% of all samples collected during the year 1938 were found to be deficient, and which deficiency is considerably higher than the previous year's inspection. While the percentage of deficiencies appears to be high, in most instances the deficiencies were balanced by overages in other elements. Where the deficiencies were found to be of a serious nature, prosecution was instituted.

TABLE I--DEFICIENCIES

CLASS OF FERTILIZERS	SAMPLES	Number Deficient in		
		NITROGEN	AVAILABLE PHOSPHORIC ACID	POTASH
Complete Fertilizers.....	894	66	25	72
Ground Bone Fertilizers.....	15	2	--	--
Superphosphate Fertilizers..	180	--	2	--
Lime Phosphate Fertilizers..	18	--	--	--
Rock and Potash Fertilizers..	64	--	1	9
Miscellaneous Fertilizers...	8	--	--	--
Total.....	1179	68	28	81

Selling Price 1938	\$30.62	\$40.99	\$21.01	\$25.92
Selling Price 1937	\$29.26	\$45.95	\$19.38	\$24.52

*Excluding Lime Phosphate

KEY TO TABLES

The following tables include the results of chemical analyses of the official samples. Each sample was given a chemist's number and analyzed for the element or elements guaranteed.

The asterisk (*) indicates those samples found to be deficient to the extent of .2% or more.

Table III. Complete Fertilizers, furnishing Nitrogen, Available Phosphoric Acid, and Potash.

Table IV. Ground Bone Fertilizers, furnishing Nitrogen and Total Phosphoric Acid.

Table V. Superphosphate and Lime Phosphate Fertilizers, furnishing Available Phosphoric Acid.

Table VI. Rock and Potash Fertilizers, furnishing Available Phosphoric Acid and Potash.

Table VII. Miscellaneous Fertilizers, including Nitrate of Soda, Muriate of Potash, Sulphate of Ammonia, and Milorganite.

WARNING

*"Section 5. Any person or persons selling, offering, or exposing for sale, any commercial fertilizer or any brand of the same, having a distinct trade-name, without the analysis required by section one of this act, or with an analysis stating that it contains a larger percentage of any one or more of the above-named constituents than is contained therein, or for the sale of which all the provisions of sections two and three have not been complied with, or any person violating any of the provisions of section four of this act, shall be guilty of a misdemeanor, and, on conviction, shall be sentenced to pay a fine of not less than twenty-five nor more than one hundred dollars for the first offense, and not less than two hundred dollars for each subsequent offense....."

The Department of Agriculture, as the agency charged by the Legislature with the enforcement of the provisions of the Fertilizer Law, copies of which are available upon request, insists upon strict compliance therewith.

*Act of May 1, 1909, P. L. 344 as amended.
